THOROUGH SUSTAINABILITY

At PF Concept, we strive to operate with sustainability in mind at all times. The products we sell are manufactured in a responsible and ethical fashion and abide by national regulatory requirement norms in each of our markets. These very norms allow our production experts to identify any issues early on in the development phase that might not comply with the aforementioned norms and hinder our sustainable production methods.

Product compliancy is also monitored throughout the entire production life cycle. We work hard to meet our customers' high expectations and transparency requirements for the European markets. Up-to-date regulations are made readily available during the production life cycle ensuring products are compliant down to the very last detail. All products are subject to compliancy reviews prior to and after launch at both our own testing facilities and at third party testing labs.

Our solid quality-control methods ensure that the products you'll choose for your brand can be sold and used with confidence.

Green Concept

In today's increasingly sustainable societies, we want to meet the high demand for eco-conscious merchandise.

The dire outlook our planet has, requires to take a step back and think about the harmful impact our choices may have when it comes to promotional items.

By offering a varied assortment of sustainably better promotional products, we're providing you with more environmentally sustainable choices for your brands to be showcased on.

Take a look inside at our collection and contribute to the continuity of healthy planet.

Enjoy!
